

2012 Enhancing Sustainable Development in Indian Country

March 21-22

Tech Team Form

The conference will host a 60-minute tech team meeting composed of a panel of experts from Maul Foster & Alongi, RMC Architects, and other technical advisors. The tech team will discuss a Brownfield (contaminated) site, economic development, or master planning problem/project presented by a tribal community.

The tech team is a unique opportunity for tribal representatives to describe a problem/project clearly; explore possible solutions; identify key technical, planning and/or financing issues; and develop an action plan.

The tribe whose project is selected for review will be contacted to submit further information so that the tech team session can be as productive and informative as possible.

Tribes Name _____

Contact Name _____

Phone number _____

Email address _____

Type of Project/Problem

Economic Development

Master Planning

Brownfield (contaminated site)

What is the project name?

What is the location of the project? Please provide the reservation name and whether the project/problem is located on fee or trust property if a site has been selected. If site selection has not been determined, please note "to be determined".

What is the size of property project (acres)? _____

When did the project begin? (Approximate date) _____

Is the project currently active? Yes _____ No _____

Describe in your own words what the project barriers are or the problem that you would like to discuss with a tech team (a paragraph or two):
